01 Overview

Banza is a Bengaluru consumer AI app: a personal AI Twin that connects to a user's shopping, streaming, email and social accounts to find better prices and earn money back. Following the Brand Audit and Identity Proposal, Aakar Labs will redesign the Banza identity so it reads as quietly capable, trustworthy and personal, rather than a reward app.

This document fixes what is included, how work and feedback are staged, and when payments fall due.

02 Deliverables

DELIVERABLE	WHAT IS INCLUDED
Logo + mark redesign	2–3 creative directions, then one refined direction: simplified two-tone flame mark and wordmark options. Includes the "Twin" mascot built from the flame geometry, with a small set of expressions.
App icon, variant set	Light, dark and monochrome icons; static and motion frames; legibility check at store sizes. Delivered as separate PNGs.
Animated logo	Three states, each with a static fallback: Idle (loop), Thinking (loop) and Done (plays once). Delivered as animation files.
Colour + typography system	Palette and type specifications. UI components are not included.
Short brand playbook	Usage guidelines with do's and don'ts.

03 Process and milestones

Work runs in staged reviews so feedback lands early and large changes of direction do not appear late. Aakar Labs shares progress on a shared board (Figma or similar); Banza comments on each stage. Total effort is about 20 working days from kickoff.

STAGE	WHAT HAPPENS	TARGET DATE
Kickoff	Intro call, shared board and WhatsApp group set up, co-founder included.	`date`
Directions	2–3 creative directions for logo, mascot and colour. Banza picks one and comments.	`date`
Draft 1	Chosen direction developed: mark, icon set, type and palette. Comments round.	`date`
Draft 2	Motion states and playbook added; refinements applied. Comments round.	`date`
Final delivery	All files and the playbook handed over.	`date`

Banza has a November marketing push, so Aakar Labs will share the icon and mark early where possible to support that work.

04 Fees and payment

PROJECT FEE

₹1,50,000

Full scope above. No GST is charged as Aakar Labs is not GST registered.

INSTALMENT	DUE ON	AMOUNT
40%	Advance, before work starts	₹60,000
30%	Approval of direction	₹45,000
30%	Final delivery	₹45,000

Invoices are issued to Banza Technologies Private Limited using the details above, payable within `7` days of issue.

05 Feedback and revisions

- Banza gives one set of consolidated comments per stage, within `2` working days of each share.
- Each deliverable includes `two` revision rounds. Further rounds are ₹10,000 each.
- A change of creative direction after Directions is approved counts as new work and is quoted separately.

06 Out of scope

- UI components and app or website screen design.
- Additional animation states, extra mascot poses beyond the agreed set, and illustration or packaging work.
- Development, copywriting beyond the headline rewrites in the audit, and third-party licensing costs.

07 Ownership

Full rights in the final approved deliverables pass to Banza on receipt of final payment. Aakar Labs may show the work in its portfolio after Banza's public launch of the new identity.

08 Agreement

By signing, both parties accept this statement of work as part of the services agreement between them.
